Discussion and Decisions

#	**Discussion and Decisions**
1.	Alan changes stream to join our group. We had a debate about political bots versus robots in healthcare. At the end we decided that robots in healthcare posed a better importance to society.
2.	A discussion was held about what kind of technology we should research. We used canvas, the AUT online library and we landed on the assignment brief where we saw “Computers in medicine and health care: Artificial body parts and bionic people”.
3.	We thought it was an exciting, fresh, original topic which poses a great deal of good with potential risks for the future.
